**„Keder of our production – a key element in combining
technical fabrics. We deliver high quality work.“**

■ INTRODUCTION

KEDER
innovative technical textiles

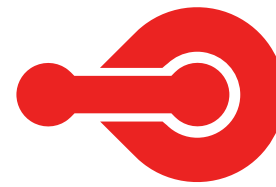

Keder sp. z o.o. is a manufacturing company, established on the basis of many years of experience in the PVC-coated fabrics industry.

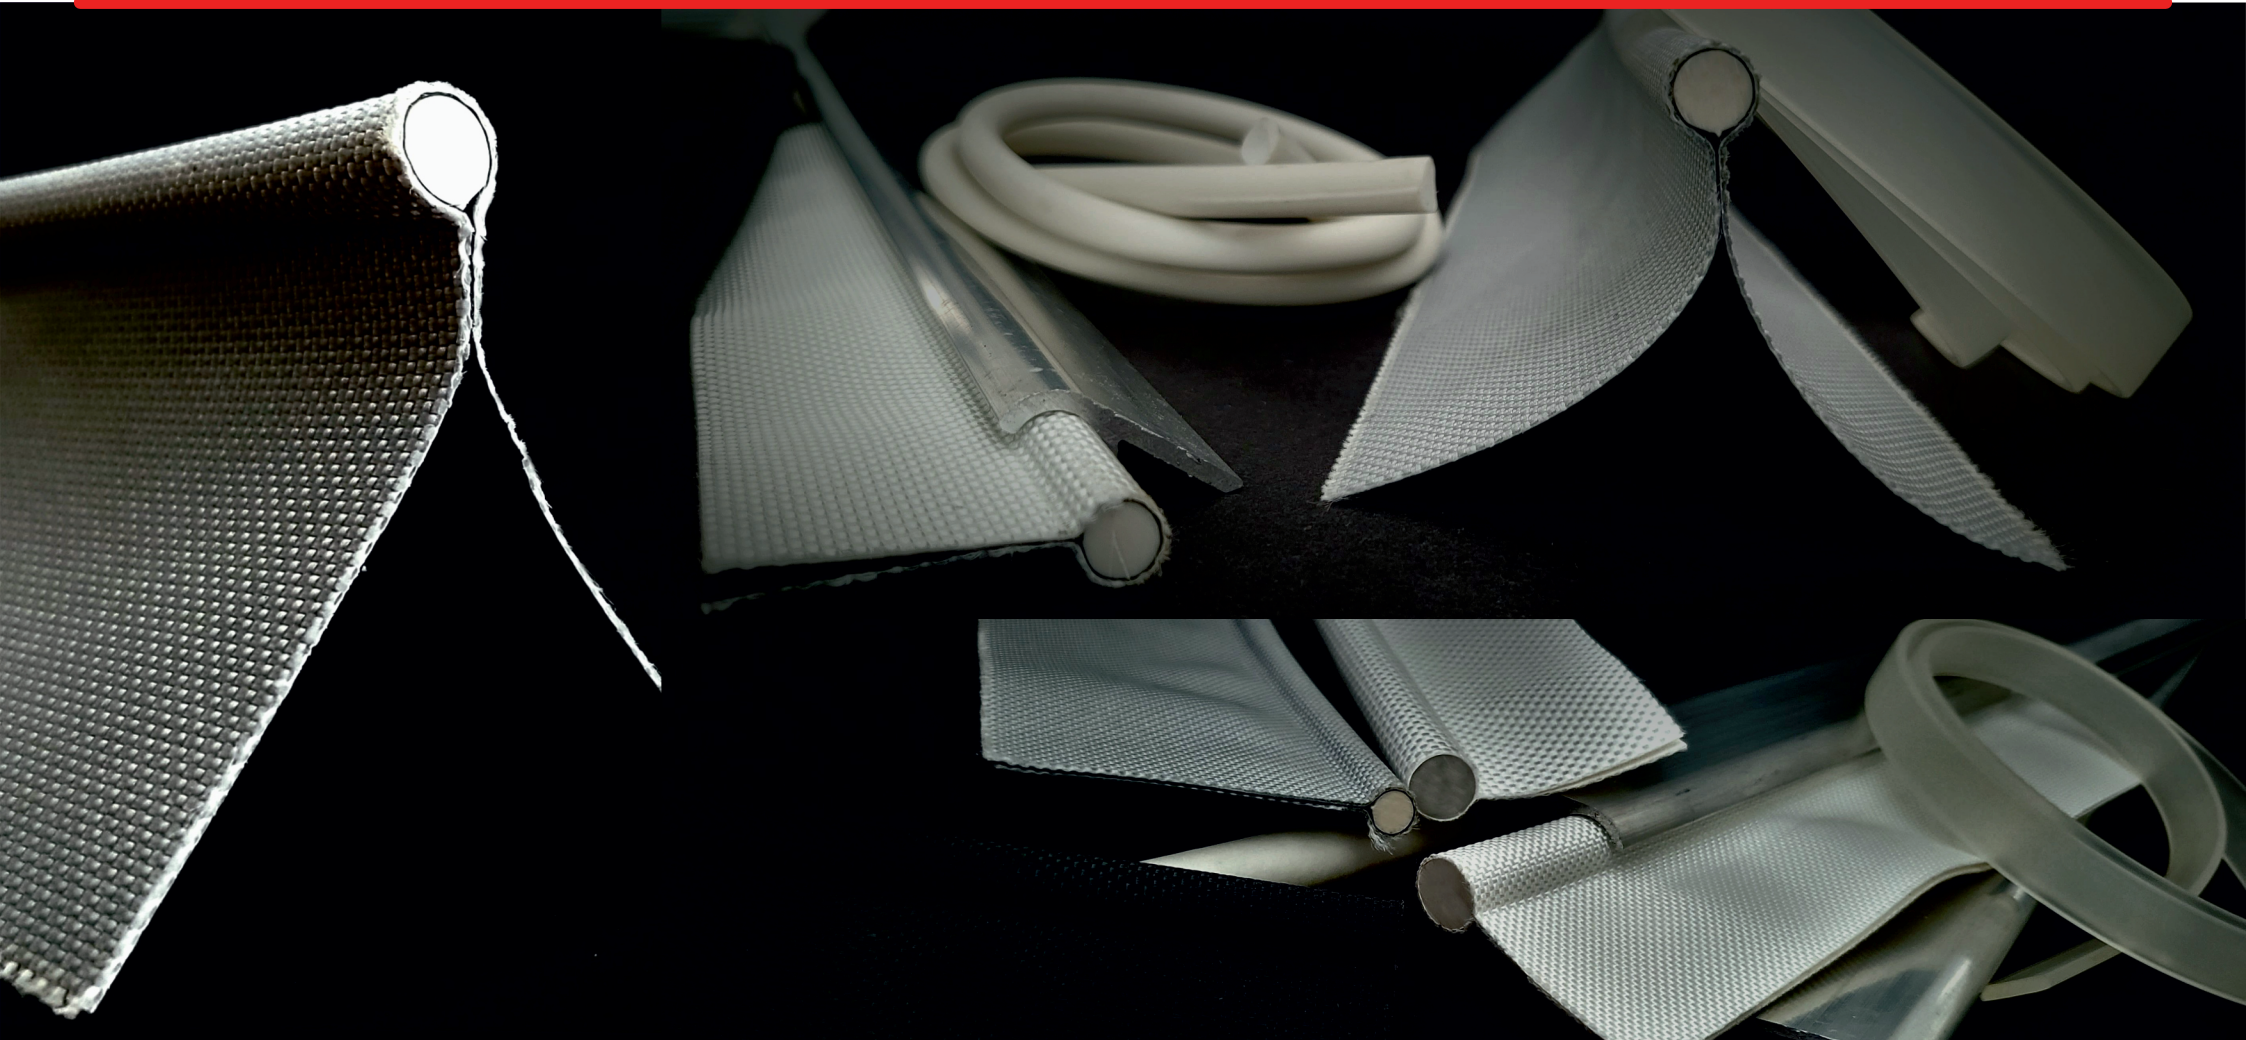

Our enterprise is one of the leaders in production and sales of keder tapes in Poland and abroad. We have been active for over 20 years, operating on the most modern machines in the industry and raw materials of the highest quality.

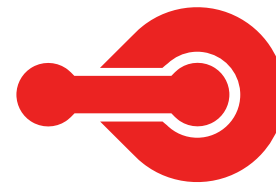

On top of the products themselves, we pay great attention to the quality of our service and pre- and after-sales activities. We propose a tailor-made offer to all customers, adjusting individual product parameters to the specific requirements of particular business partners.

Our team of experts provides support and know-how at every stage of implementation and production, guaranteeing the safety and stability of the supply chain.

The KEDER tent tapes produced by us are used for the installation of:

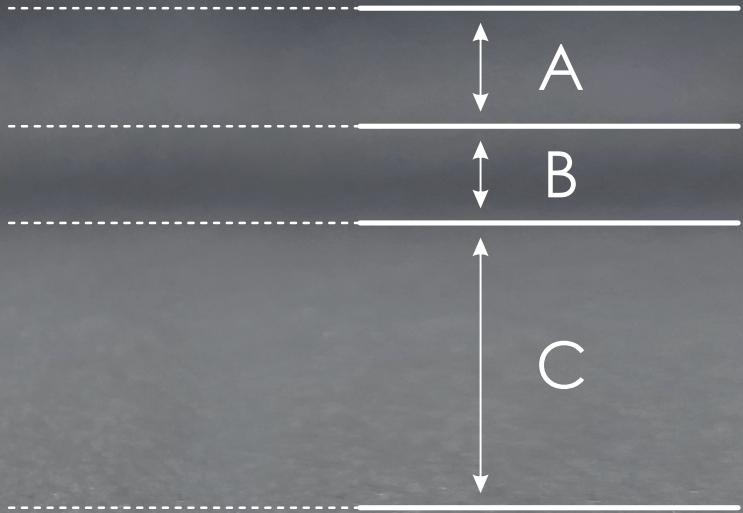

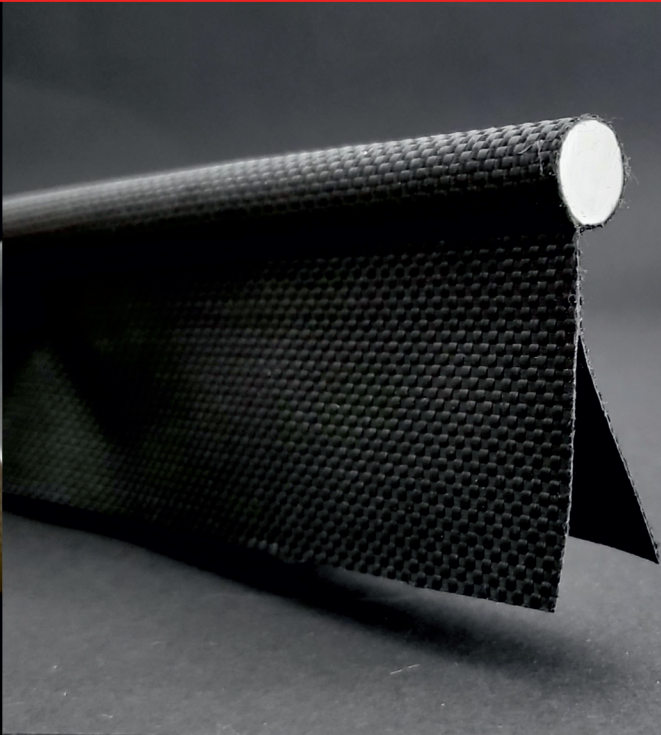

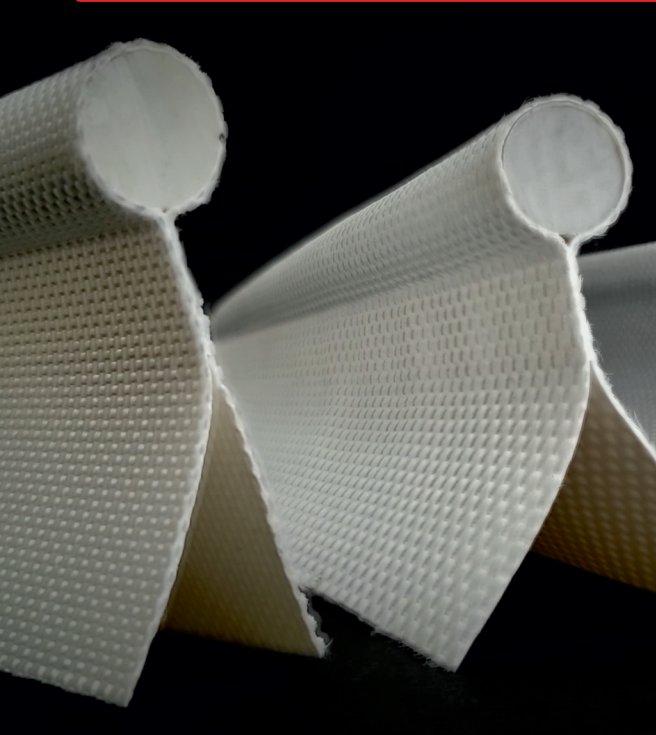

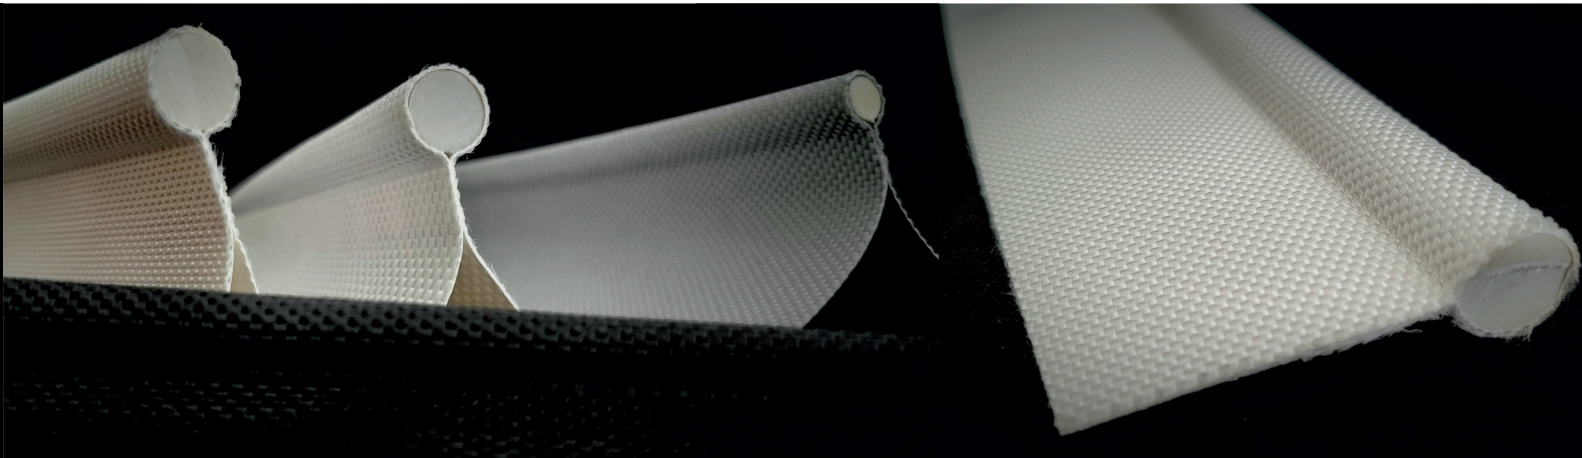

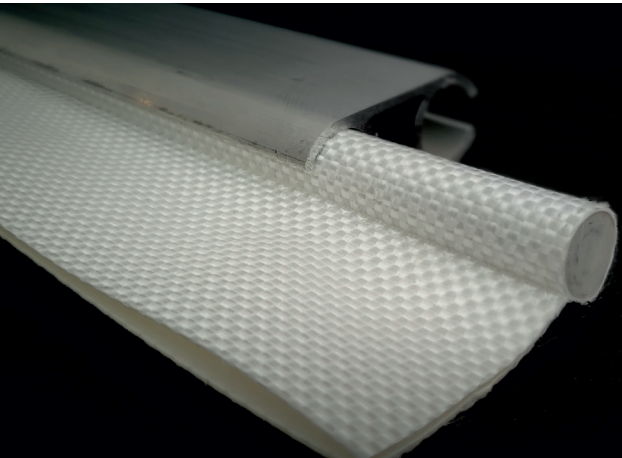

- halls and tents
- advertising banners
- awnings
- architectural tension structures
